

Marigold

“Petite Yellow”

Petite Yellow Marigolds are compact annual flowers, typically growing 6-8 inches tall, that boast bright yellow, button-like blooms. They are ideal for borders, containers, and even mass plantings, adding a touch of vibrant color to any garden. Known for their easy care and long blooming season, they are a popular choice for both novice and experienced gardeners. Deer Resistant

Key Features:

- **Compact Growth:** Reaching only 6-8 inches tall, they fit well in smaller spaces and containers.
- **Vibrant Blooms:** They produce abundant, cheerful yellow blooms that are a long-lasting addition to gardens.
- **Easy to Grow:** They thrive in full sun and are relatively low-maintenance.
- **Long Blooming Season:** They bloom from midsummer until frost.
- **Versatile Use:** They are excellent for borders, containers, and mass plantings.
- **Attracts Pollinators:** The bright blooms attract bees, butterflies, and other pollinators.
- **Potential Pest Control:** Marigolds are known for their ability to deter certain garden pests.

Growing Tips:

- **Sunlight:** They need at least half a day (6 hours) of sunlight to thrive.
- **Soil:** Well-drained, fertile soil is preferred.
- **Care:** Water regularly, especially during dry spells, and deadhead spent flowers to encourage more blooms.
