

Strawflower

“Choice Mix”

Strawflower 'Choice Mix' thrives in full sun with 6+ hours of direct sunlight per day, preferring well-drained soil and temperatures around 70-75°F (21-24°C). While they are drought-tolerant, they benefit from regular watering, especially during extended dry periods.

Detailed Growing Guide:

Transplanting Outdoors:

- **Timing:** Transplant outdoors after the threat of frost has passed.
- **Spacing:** Space plants 10-12 inches apart.
- **Soil:** Strawflowers prefer well-drained soil.
- **Sunlight:** Provide 6+ hours of direct sunlight per day.
- **Watering:** Water thoroughly after planting and then let the top inch or two of soil dry before watering again.

Growing Conditions:

- **Soil:** Well-drained soil with a slightly acidic to neutral pH.
- **Watering:** Water regularly, especially during dry periods, but avoid overwatering.
- **Sunlight:** Full sun is best, but they will tolerate partial shade.
- **Fertilizing:** Fertilize every 4-6 weeks with a balanced fertilizer.

Care:

- **Pinching:** Pinching back the plants will encourage more branching and flowering.
- **Deadheading:** Deadhead spent flowers to promote continued blooming.
