

Tomato

“Red Pride”

Determinate

The blue ribbon winner! 'Red Pride' yields a bountiful harvest on vigorous, compact plants. Its reliable production of 10-ounce fruits combined with an excellent disease resistance package, including Alternaria stem canker, gray leaf spot, Fusarium wilt (1, 2), and Verticillium wilt, make it a winner for any garden!

ASC, GLS, F1-2, VW

Below is a key to tomato disease/pest resistance:

ASC = Alternaria Stem Canker

EB = Early Blight

F = Fusarium Wilt Race 1

F2 = Fusarium Wilt Races 1 & 2

GLS = Gray Leaf Spot

LB = Late Blight

RKN = Root Knot Nematode

TMV = Tobacco Mosaic Virus

ToMV = Tomato Mosaic Virus

TSW = Tomato Spotted Wilt Virus

TYL = Tomato Yellow Leaf Curl Virus

V = Verticillium Wilt
